

Jefferson Duarte Ramos Dos Santos

Position: Full Stack Developer.

Location: Seropédica/RJ

About me

Hello! My name is Jefferson, and I'm a developer passionate about technology and innovation. With a solid background in Systems Analysis and Development and practical experience in front-end and back-end development, I am always looking for challenges that allow me to grow and contribute to incredible projects.

Soft Skills:

Problem solving, teamwork, self-taught, quick learning, I find it easy to assimilate new technologies and concepts. I believe that the ability to learn quickly is essential in our field constantly evolving, communicative, empathetic, resilient, organized, proficiency in English (advanced) able to dialogue and maintain conversations in English.

Hard Skills

I have experience with front end technologies, with React being my main tool in this area, the language I use to develop software is Javascript plus Typescript and I have knowledge in some React frameworks like Nextjs, Gastby, Svelte, Angular, Vue. Some Styling tools include tailwindcss, SASS, Styled-components, CSS-in-JS, etc. For mobile development, I have solid knowledge in React-native/Expo, including applications published on the Google Play Store.

For back end development, I have experience and knowledge in Nodejs and its main technologies such as Express and Nestjs, the latter being basic knowledge. I have already developed REST API and RESTFUL, business rules, integration between APIs and systems. Database I prefer work with noSQL and my favorite database is MongoDB, as it is more versatile and scalable, but I also have solid knowledge in SQL, as well as XAMPP, Postgres, SQ Lite, etc. There are some ORMs that I used, and for each case, Mongoose, PrismaORM and TypeORM I use for both cases, as they are versatile to the point that they can be used with SQL or noSQL.

Education

Analysis and systems development

- Feb 2022 - Jul 2024 (Higher degree course via distance learning, last period)
